28 · card

full · pill

Screen gutter 20px. Section rhythm 28px. Card padding 20–24px. Touch targets never below 44px.

Iconography

One family, 1.6px stroke, round caps and joins, 24px grid. Lime marks the active state; everything else is mono. No emoji, no filled glyphs.

Botanical imagery

Plants are photographic cut-outs on transparent backgrounds, uploaded as artifact assets and placed bottom-aligned so the subject stands on the card rather than floating in it.

Grounds stay pale behind them: mint #E9F7D8 → #D2EAC4 and sage #E4F2EC → #CFE3D6 for cards, ink for hero and scan surfaces. Crop generously.

Components

Every screen is assembled from these. Controls are real buttons, links and labelled inputs — nothing clickable is a bare div.

STEP 4 OF 5

Stay ahead of problems

Reminders arrive before trouble does, and shift with the weather instead of a fixed calendar.

Continue

ALMOST THERE

2,400+ species in the Pokedex

STEP 5 OF 5

Let's grow your collection

Scan the plant nearest to you and it's in —
profile, schedule and health record included.

Get started

I'll add plants later

Not now

Help us understand your plants' environment.

Four things make the advice specific to your home. Turn on what you're comfortable with — you can change any of it later.

Local weather

Allow location access to provide weather-aware care insights.

Care reminders

A quiet nudge when watering or a condition update is due.

Camera

Needed to identify plants and log condition photos.

Photo library

Optional — identify a plant from a photo you already took.

Location is only ever used to read the weather for your area. Photos stay in your collection unless you choose to share them.

Allow and continue

Good morning

Monstera deliciosa

Easy care

Tropical

Toxic to pets

A climbing aroid from the rainforests of southern Mexico and Central America. Young leaves are solid hearts; as the plant matures and gets more light, new leaves open with the holes and splits it is known for.

Light

Bright indirect

Water

Every 7–10 days

Temperature

18 – 30°C

Humidity

60% and up

Origin & growth

Native range

Southern Mexico → Panama

Mature height

2 – 3 m indoors

Growth habit

Climbing, needs support

Common issues

Yellowing lower leaves

Usually too much water. Let the top 5cm of soil dry before the next round.

No splits in new leaves

A light problem, not a health one. Move it closer to a bright window.

Care tips

- Wipe the leaves monthly — dust cuts the light they can use.
- Give it a moss pole once aerial roots appear; leaves get larger with support.
- Repot every second spring, one pot size up, in a chunky airy mix.

Add to My Plants

Today's insights

3 new

Warm conditions today

Your tropical plants may need more frequent moisture checks — four plants affected.

Low light conditions

Your low-light plants are likely comfortable, but watch growth over the coming weeks.

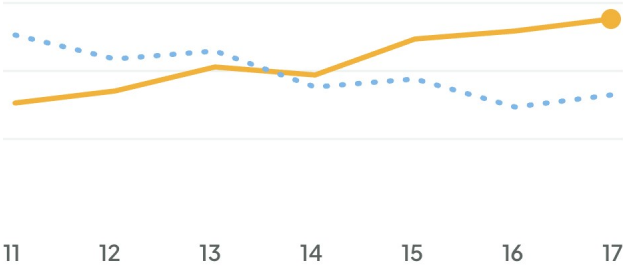

Rain expected tomorrow

Outdoor plants may need less manual watering — two schedules shifted automatically.

Environmental history

Temperature Humidity

HEALTH CORRELATION

Humidity above 60% tracks with your best health scores.

Across 9 weeks of updates, your tropical plants score 11 points higher on humid weeks. A pebble tray through the dry season should hold the gain.
